

## TECHNICAL INFORMATION

### BEST-LEAK DETECTOR SPRAY

**BEST-Leak detector spray** is a product for maintenance and inspection of gas- and compressed air systems. It works with pure nitrogen and therefore is non-flammable. The bubble-forming, aqueous tenside solution detects leakages in pipelines with gaseous media, e.g. compressed air, natural gas, technical gases.

#### INSTRUCTIONS FOR USE

For controlled leak detection and for surveillance spray product on the potential leakage areas on lines and connections from a distance of approx. 30 cm. Bubble formation makes leakages visible.

#### PROPERTIES:

Appearance	Colourless
Odour	Perceptible
Temperature range	0°C up to +80°C
Characterisation	Aqueous tenside solution non-flammable

#### General

The data and information above correspond to the current know-how of BEST-Klebstoffe GmbH & Co.KG. Our information and data have been developed from laboratory tests and extensive practical experience. It is the user's responsibility to perform receiving inspections and to determine suitability for the user's purpose of any production methods. We disclaim all warranties expressed or implied, that any product will have specific properties for a particular purpose. BEST-Klebstoffe GmbH & Co. KG reserves the right to change the contents of this document as necessary.
